

Industrial Support Solutions

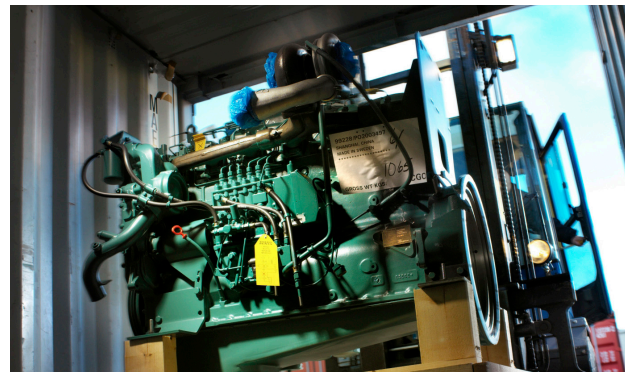

INDUSTRIAL SUPPORT SOLUTIONS

Babcock delivers trusted expertise, reliable solutions and specialist services for critical industries.

Four specialised capabilities. One trusted partner.

Plant and Lifting Solutions

Industrial Power Solutions

Welding Solutions

Technical Services

Engineering support you can rely on. Industrial capability you can trust.

With decades of experience supporting critical industries, Babcock delivers specialised industrial support services that help customers execute projects safely, maintain uptime and improve operational reliability.

From specialised lifting and plant hire to industrial power generation and advanced welding solutions, we combine specialised equipment, engineering expertise and technical services to support complex industrial operations across Southern Africa.

Supporting customers across the energy, mining, construction and industrial sectors, we work alongside our clients to deliver dependable solutions that keep operations moving with confidence.

Creating a safe and secure world, together.

Safety is embedded in Babcock's operational culture through structured SHEQ systems, training programmes and continuous improvement practices. Our approach incorporates proactive risk management, ongoing safety training, continuous improvement processes and compliance with applicable regulatory standards to support safe, responsible and efficient operations.

**Supporting
critical industries**

Your partner in industrial support

Reliable equipment, skilled teams and integrated solutions.

Babcock integrates four specialised capabilities into one coordinated industrial support offering, helping customers execute complex projects, maintain operational continuity and improve performance across critical industries. Backed by experienced teams, reliable equipment and engineering expertise, each capability is designed to support safe, efficient and dependable outcomes.

Plant and Lifting Solutions

Specialised lifting and plant capability supporting construction, shutdowns and industrial projects.

Welding Solutions

Advanced welding technology and technical expertise for demanding environments.

Industrial Power Solutions

Generator solutions supporting continuity of operations.

Technical Services

Maintenance, inspection and engineering services supporting lifecycle performance.

Supporting critical sectors across Southern Africa

mining

construction and infrastructure

energy

oil & gas

manufacturing

pulp and paper

The Babcock Advantage

Working with one trusted industrial partner means customers can access multiple specialised solutions through a single point of contact. This simplifies coordination, improves efficiency and helps projects run safely, reliably and efficiently from start to finish.

Plant and lifting solutions across critical industries

Babcock provides specialised plant hire and lifting solutions that support industrial construction, maintenance shutdowns, infrastructure projects and heavy equipment installation across Southern Africa.

Backed by experienced operators, technical teams and well-maintained equipment, we support complex lifting and transport requirements with a strong focus on safety, reliability and operational efficiency.

What we offer

- ✓ Mobile crane hire with 30 - 500 ton capacity
- ✓ Heavy plant equipment
- ✓ Small plant equipment
- ✓ Material handling equipment
- ✓ Lifting and hoisting solutions
- ✓ Abnormal load transport and low beds

Where we support operations

- Infrastructure construction
- Industrial shutdown execution
- Mining maintenance work
- Petrochemical plant projects
- Heavy equipment installation

What you can expect

- Reliable equipment availability
- Certified lifting capability
- Safety-driven execution
- Technical project support
- National service capability

Industrial power solutions supporting operational continuity

Reliable power supply is essential for safe and productive operations. Babcock provides industrial generator solutions ranging from 15kVA to 4mVA, supported by power system design, installation, commissioning, maintenance and remote monitoring services.

What we offer

- ✓ Generator supply
- ✓ Power system design
- ✓ Installation and commissioning
- ✓ Maintenance agreements
- ✓ Remote monitoring capability

Where we support operations

- Industrial facilities
- Mining operations
- Commercial environments
- Infrastructure projects
- Backup power systems

What you can expect

- Reliable power availability
- Reduced operational interruption risk
- Improved equipment visibility
- Technical service support

Advanced welding capability for industrial environments

Through its preferred partnership with Lincoln Electric, Babcock International Group provides customers across Sub-Saharan Africa with access to globally recognised welding technology, consumables and technical expertise. This capability supports fabrication, maintenance and engineering projects requiring reliable welding performance in demanding industrial environments, backed by OEM technical support, authorised equipment servicing capability, and welding training and skills development support.

What we offer

- ✓ Lincoln Electric welding equipment
- ✓ Welding consumables supply
- ✓ Technical application support
- ✓ Equipment servicing and repairs
- ✓ Welding training programmes
- ✓ Welding automation solutions

By combining Lincoln Electric technology with Babcock's engineering capability, customers gain welding solutions designed for reliability, performance and industrial durability.

Where we support operations

- Fabrication projects
- Industrial maintenance
- Shutdown work
- Engineering construction
- Equipment refurbishment

What you can expect

- Improved welding productivity
- Consistent fabrication quality
- Access to advanced welding technology
- Specialist technical support
- Authorised repair capability

Technical support across the equipment lifecycle

Babcock provides technical services designed to improve equipment reliability, reduce downtime and support operational performance. Technical teams provide structured maintenance and engineering support.

What we offer

- ✓ Maintenance agreements to improve equipment reliability and reduce unplanned downtime
- ✓ Equipment repairs performed by experienced technical specialists
- ✓ Technical inspections to identify issues early and support asset integrity
- ✓ Specialist technical support to keep operations running efficiently
- ✓ Skills development and training to strengthen workforce capability
- ✓ Operational advisory services to optimise performance and extend asset life

Part of the Babcock Africa Group

Industrial Support Solutions is backed by the strength and expertise of the Babcock Africa Group. Together with our capabilities in engineering, mining and construction equipment, transport solutions including DAF Trucks, and technical education and training, we help customers solve complex challenges and support critical operations across the asset lifecycle.
