

PORT MATERIAL HANDLER

WITH A REACH OF UP TO 29 m

🔛 Такана 🚺 табатана / 👬 📽 170 t / 🧀 29 m / 🗰 391 кw

Stage V

A smart approach to port logistics – the giant material handler with an operating weight of up to 170 t is right at home in the ports of this world. Numerous configuration options and customer-specific undercarriage solutions make it the ideal machine for industrial applications and demanding material handling tasks in ports.

A long-term investment

The E-series is characterised by robust components, and an intelligent and resource-efficient machine design – the machine retains its value over the long-term, even with demanding continuous use.

Energy efficiency

Appreciated around the world, thanks to drives that are resource- and environmentally-friendly and the Green Hybrid energy recovery system – whether with diesel drive or as an electric version.

Occupational safety

Thanks to the precisely controlled movements and the numerous safety features, you can work effortlessly and safely throughout your day.

Modular variety

Unique machine variety – we build the perfect machine to meet the needs of your port.

Maximum comfort

The spacious cabs are designed with the needs of the operator in mind – comfortable and spacious with sophisticated features.

Maintenance & Service

Intelligent fleet management and machine status monitoring via the SENtrack portal as well as unique accessibility of machine components.

BIR WARD

AN INVESTMENT THAT PAYS OFF.

The durability and reliability of the SENNEBOGEN Green Line is based on decades of experience in the design of high-quality crane and material handling technology. We can find the perfect solution for every port application, ensuring you can handle general cargo and bulk materials in an efficient and resource-saving way.

Consistent performance thanks to robust steel construction, and high-quality drive and control components from renowned manufacturers

Low operating costs thanks to

energy-efficient electric drives

and energy recovery through the

Green Hybrid system

High handling capacity of up to 1,200 t per hour* reduces the berthing time of ships

Manageable and

service-friendly technology for

maximum machine availability

Sophisticated technology thanks to the consistent further development up to the 5th generation of the E-series – for demanding material handling

Durable and robust in extreme weather and harsh operating conditions, works equally well in the cold of the Arctic Circle or the heat of Dubai

* The specified handling capacity is a reference value that can be achieved with the appropriate grab for the machine (see Attachments catalog). Actual handling capacities depend on the individual loading and unloading situation in the port and are the result of various parameters (e.g. lifting height, angle of rotation, ship shape, grab fill level, grab).

>25,000 operating hours for this 875 E in Turkey

COM

LONG SERVICE LIFE, HIGH VALUE RETENTION

- Reliable and powerful thanks to its robust construction and high-quality components.
- Temperature-controlled cooling system, designed and tested for heavy-duty applications and high ambient temperature

SOPHISTICATED, STATE-OF-THE-ART TECHNOLOGY

In the 5th generation – decades of experience in designing and constructing material handlers

EASY TO MAINTAIN AND SERVICE

Technology that can be mastered and no over-engineering, optimum accessibility to all components

ENVIRONMENTALLY-FRIENDLY DRIVE TECHNOLOGY

State-of-the-art engine, drive and emission systems in line with the latest technology standards (stage V)

Large-scale pipes and valves for maximum efficiency

50 %

Save operating costs by significantly reducing energy consumption

anten ante

SENNEBOGEN – WORLD LEADER IN ELECTRIC MATERIAL HANDLERS.

Over the last **35 years**, we have implemented by far the most electrical applications

- A complete solution direct from the manufacturer detailed route analyses and individual power supply project planning, tailored specifically to your application
- A variety of solutions for power supplies, voltage types and emergency operating units ex works
- No fuelling stops or need to store fuel always ready for use
- Service intervals twice as long as for diesel engines and lower service costs: no need for fuel / oil filters and oil changes
- // High value retention and significantly longer service life
- 📕 No exhaust gas good for the environment, good for people
- Low-noise and vibration-free operation for greater working comfort
- // Cleaner engine compartment even after long service life

GREEN HYBRID – THE MOST SOPHIS TICATED ENERGY RECOVERY TECHNOLOGY ON THE MARKET

GREEN HYBRID ENERGY RECOVERY TECHNOLOGY

Energy recovery with a safe and intelligent design: Watch the video to find out how the SENNEBOGEN Green Hybrid System makes port material handling even more efficient.

https://www.sennebogen.com/green-hybrid

Save up to

50%

energy

Boom lowers, gas compresses

Protects the environment, saves energy, reduces your costs.

Energy storage module consisting of nitrogen piston accumulators

The nearly constant force transmission throughout the cylinder cycle supports the next boom lift

- System advantages: large system volume and constant force transmission over the entire cylinder cycle
- System stability through constant pressure and temperature control
- Functional safety through the use of standard hydraulic components in the protected rear area of the machine
- System can be optimally adjusted to the individual task, depending on the weight of the material being handled
- Simple inspection and system filling via SENCON control system from the operator's seat

SAFETY FIRST.

Enjoy a safe work environment thanks to numerous safety features developed especially for port use. Protecting people, port and machine.

HOW TO OPERATE THE SAFETY BOOM LIFT

This video will show you how the SENNEBOGEN Safety Boom Lift works.

https://www.sennebogen.com/safety-boom-lift

Bio Oil -Panolin

875**E**

for extended oil change intervals, with safe environmental compatibility

Safety Boom Lift

Grab automatically lifts as it closes, protecting ship hulls, port surfaces, equipment and the grab itself

SENtrack

Maintain fleet management safety by monitoring the condition of your machines

Component safety

SENJEBOGEN

60

1048

maximum service life thanks to the robust steel construction - produced in our very own subsidiary

Safe & ergonomic

optimum cab and machine component accessibility via stairs and ascents

ciummi pininini

Load moment limitation

SERJEBOGEN

Protection of equipment by switching off in the event of an impermissible load

Optimum camera monitoring

of all safety-relevant areas*

EXPERIENCE VARIETY FOR EVERY TYPE OF MATERIAL

Today general cargo, tomorrow bulk cargo – working in the port means staying flexible from day to day. The entire range of material handling technology can be flexibly operated using the quick change system on the stick and the SENNEBOGEN port machines' powerful hydraulics.

Bulk material (feed, coal, etc.)

Scrap handling

Timber grab

Big Bag loading

Timber spreader/wooden pallet loading

Pulp spreader

Paper coil grab

Quick change system with lifting beam

Vacuum lifter

QUICK AND EASY GRAB CHANGE

Watch the video to see how quick and easy it is to change the grab with the quick change system on the stick!

https://www.sennebogen.com/quick-coupler

A MODULAR DESIGN. NUMEROUS APPLICATIONS.

Subject to technical changes. Additional options available upon request.

WHAT DOES YOUR MACHINE LOOK LIKE?

Configure your individual machine using our modular system. The great variety of solutions that we can implement in this way is unique.

CUSTOM CONFIGURATION

More than 16,000 unique material handling solutions can be delivered through SENNEBOGEN's modular machine design - watch the video now!

SERVEBUGEN

https://www.sennebogen.com/versatility

Everything in view

The spacious cab with panoramic view gives you a practical overview of your work area. The window in the floor makes it possible to carry out precise loading operations even in close proximity. The safety cameras provide support and allow you to monitor the critical areas conveniently via the monitoring system in the cab.

Easy control

The intelligent SENCON control system gives you quick and easy feedback on the machine's condition. Thanks to the intuitive user interface, it has never been easier to monitor energy consumption and utilization, control the desired working modes and contribute towards reducing operating costs.

For your health

Operators spend many hours in their working position. The back-friendly comfort seat, adjustable armrests, joysticks that sit comfortably in the hand, and the optimally arranged controls make daily work as easy as possible.

Pleasant indoor climate

Whether in warmer areas or in ports with sub-zero temperatures, you can enter a work space with a comfortable temperature every day and concentrate on the essentials of work thanks to automatic heating and air conditioning. "We welcome regular feedback from operators to ensure the work space is configured perfectly."

ROBERT AUMÜLLER, Head of the Port Business Unit

CAB HIGHLIGHTS

Maxcab premium cab in the industrial edition

The large capacity cab for the best all-round view of the port

IN SERIES		<u>master</u> (cas)
ENTRANCE	Sliding door incl. sliding window	Easy access through wide cab door
WINDSHIELD	Undivided windshield made from bullet proof glass, rigidly glazed	Tinted double glazing for side windows
SKYLIGHT	Skylight made from bullet proof glass	Large skylight with sun protection slats and windshield wiper with washing system
FLOOR WINDOW	-	Bullet proof glass floor window
MIDEDC	Wipers for skylight	Parallelogram wipers for harsh weather conditions
WIPERS	Wiper and washer system for front windshield	-
AIR CONDITIONER	Automatic heating/air conditioning with fresh air and recirculating air filter	Automatic air conditioning with optimised de-icing and demisting function
FLOODLIGHTS	Floodlights integrated into roof	Floodlights integrated into the uppercarriage and roof
FOLDAWAY SEAT	-	Foldaway seat in cab
RADIO	✓	✓
SENCON CONTROL AND DIAGNOSTIC SYSTEM	\checkmark	× 1
OPTIONS		
AIR-CONDITIONED SEAT	✓	✓
RADIO		
COOLING BOX BEHIND THE OPERATOR'S SEAT	✓	✓
PROTECTIVE GRILLE ON SKYLIGHT AND WINDSHIELD	-	✓
SUN PROTECTION PACKAGE	\checkmark	\checkmark

SENJEBOGEN 20

ALWAYS THE RIGHT VIEWING ANGLE

The name 'Skylift' can be taken literally! Depending on the version and undercarriage being used, the flexible cab adjustment allows you to look into a ship's hull from around 13.5 metres. Thanks to a sophisticated system of steps, ascents and railings, access to the cab and maintenance points on the uppercarriage is safe and comfortable.

875

PROFESSIONAL FLEET MANAGEMENT

📕 1. Reduce service costs

The dashboard is used to monitor the machine and its main operating parameters (temperatures, consumption). If key figures deviate significantly from the target value, preventive maintenance can be arranged.

2. Reduce consumption

You will receive daily updated insights into your fleet processes: Easily identify and optimize times when machines are idle or change set parameters when machines are underloaded to reduce consumption.

"What if you could receive real-time data from all your machines with just one click and so increase your productivity? SENNEBOGEN's SENtrack telematic system makes this possible."

📕 3. Improve productivity

With just a few clicks, you can identify and optimize machine capacity, analyse routes if required and thus make your port processes more profitable.

SENtrack

📕 4. Safeguard your investment

Practical alarm messages inform you about critical machine conditions. In the event of irregular movements, the machine can also easily be deac-tivated remotely.

MAINTENANCE AND SERVICE.

KEEP IT SIMPLE. WITH MANAGEABLE TECHNOLOGY.

Reliable and practical technology makes life easier. Where electronics add no value, we rely on hydraulics and electrical systems.

We make you happy, not reliant. With cost-effective components and fewer process steps, you can take care of your own machine.

The most important components, such as the accumulator module or the electrical distributor, are all easily accessible from a central point for straightforward checking and troubleshooting.

The SENCON control system supports you with diagnostics and makes troubleshooting easier. So your machine is back in action more quickly.

All maintenance and service points are clearly arranged and easily accessible. The clear labeling of components makes finding your way around easy.

MACHINE TYPE

MODEL (TYPE) 875 Hybrid

DIESEL ENGINE	
ТҮРЕ	Stage V: Cummins X15 FR11813 ¹ Rated Power: 391 kW/1800 rpm Operating point standard: 391 kW/1800 rpm Operating point ECO: 374 kW/1650 rpm Stage Illa: Caterpillar C15 Acert Rated power: 433 kW/2100 rpm Operating point standard: 433 kW/1800 rpm Operating point ECO: 423 kW/1650 rpm
	both: Automatic idle stop
COOLING	water-cooled, charge air cooling, coolant cooling
DISPLACE- MENT	approx. 14 (V) / approx. 15 (IIIa)
NUMBER OF CYLINDERS	6
BATTERIES	2 x 210 Ah, battery disconnect switch
ELECTRICAL SYSTEM	24 V Alternator: 105 A (V) / 95 A (IIIa) Starter: 9 kW (V) / 8 kW (IIIa)
OPTIONS	electrically heated fuel pre-filter water separator 24 V (IIIa)
	Engine block heater
	Engine oil preheating
	Additional cyclone pre-separator for use in dusty environments
	Electric fuel pump

TANK CAPACITY

FUEL	2100 l
ADBLUE	105 l
HYDRAULIC TANK	1400 l
COOLANT	approx. 115 l
ENGINE OIL	approx. 45 l (V) / approx. 68 l (IIIa)
CENTRAL LUBRICATION SYSTEM	Automatic central lubrication for equip- ment and slewing ring, display of fault and empty message via SENCON
	Lubrication pump with 16 kg reservoir (for min. 400 operating hours)

UPPERCARRIAGE		
DESIGN	Torsion-resistant box design, precision crafted, steel bushings for boom mount- ings. Service-friendly design, engine installed in the longitudinal direction	
COOLING SYSTEM	Cooling system with 3 cooling circuits and demand-driven fan control consisting of: Coolant cooling and hydraulic oil cooling, hydraulically driven, thermostatically con- trolled incl. fan reversal; charge air cooling driven directly by engine	
OPTIONS	LED lighting package	
	Swing bearing brake via foot pedal	
	Fire extinguisher	
	Maritime climate paint	
	Low temperature packages	
	Electrical hydraulic tank preheating	
	Magnet generator 25/33 kW	

OPTIONS	Type: 390 kW, standard with frequency converter	
	Power: Total connected load 720 kVA, machine side fuse 800 A (also with gener- ator) at 400 V - motor start via frequency converter	
	IP protection class: IP 55 standard, (IP 65 optional)	

¹ incl. exhaust gas aftertreatment (diesel particulate filter, SCR catalytic converter, AdBlue tank)

LOAD RATINGS

Notes:

20201105140145

All load ratings are given in tons (t) brought to bear at the end of the stick, without tools on firm level ground. Working tools such as grab, magnet, loadhook etc. are included in the specified load ratings. The stated values are 75 % of the static tipping load and 87 % of the hydraulic lifting force in accordance with ISO 10567 and apply after the required operating temperature has been reached in the Green Hybrid system. According to EU standard EN 474/5, material handling equipment used for hoisting must be equipped with a pipe rupture safety device on the lifting cylinder and an overload warning device. The specified load ratings apply to maximum track width and 360° slewing.
